PROJECTS

sLARBS

A LARBS-like set of scripts to save a backup of all installed packages and their config/dotfiles from an arch linux or arch linux based distribution to a git repository, and to download and install those onto a new system in a very small amount of time and effort.
Link : github.com/1000dinari/arch

Personalized DWM configuration

A personalized configuration of the tiling window manager dwm, developed by suckless.org, written in C. Every user is supposed to edit their preferences directly into the source code and compile the program on their own.
Link : <https://github.com/1000dinari/arch/tree/master/dwm-6.2>

CSFDD

A book I'm currently writing on computers which dives into hardware, software, virtual machines, linux and android.
Link : Coming soon
